

**DATE:** January 12, 2006

**FROM:** Technical Service Dept. & Engineering Dept.

**SUBJECT:** Sewing System Infeeds: New Knife for Poly and Paper Bags

Model 400T sewing systems that have a bag top trimmer utilize knife blades that are designed for either a paper (#A2626) or plastic bag material. Fischbein is introducing new plastic (poly) knives (#A2681) which replace the # A2671 knives. There are a variety of woven polypropylene (WPP) bags in use in the market. Some are soft and some are tough. Biaxially Oriented Polypropylene (BOPP) is the toughest. They are popular because of their ability to resist abuse, providing greater product protection. Fischbein developed the new A2681 knives to work well with these bags, while also ensuring good durability. They still feature the two-sided blades, which can be turned over and used again.

**A2626 Knives:** paper bags

**A2681 Knives:** polypropylene (including WPP and BOPP) and poly-lined, paper bags
