SUBJECT: SMC Solenoid Valve Replacements

A number of special-series SMC solenoid valves were released from SMC under the same part number and they can be identified by their BLUE override buttons. The original SMC solenoids have an ORANGE override button. Unfortunately, the coils used in both configurations are not compatible. For that reason, Fischbein will stock the replacement coils for both the original and special-release solenoid versions. If you need a replacement or spare part for either solenoid version, please follow the chart below for the correct replacement part:

Replacement Part Number BLUE Override	Replacement Part Number ORANGE Override	Description
67918	67684	24VAC COIL
67919	67685	24VDC COIL
67920	67686	110VAC COIL
